

Serving the industry for over 25 years

BARRIER LIFT

Fully Automatic Grab and Release
for hands-free barrier placement

Lifting Eye hooks up with a
capacity rated lifting strap and shackle

Handles on both sides

allows personnel to
guide the lifter
into
position

Optional self alignment
legs are available for
model KL9000 and larger.
These allow the
machine operator
to lower the lifter
onto the wall without
the need for assistance.

**The LARGEST
MOST POWERFUL
BARRIER LIFTER
IN THE INDUSTRY**

Scan to see video of the
Barrier Lift being used
on an actual job site

Pad Angles
are streamlined for
tighter stacking and
they swivel to
match the slope
of each wall

Large Elastomer Pads
provide a superior grip
and won't slip, even
when lifting wet wall

Wide 6 - 12" Grip Range

handles common wall in all 50 states*

* Texas low profile 28" wall has its own model
